# ARTCATILLUSTRATED

Commission info and rates

---

## Payment

Payments are done via PayPal only, with a 50% deposit upfront. Remaining is charged once the commission is completed. Invoices are sent via email. Payments are non refundable once I've started on the commission. All rates are in USD.

## Copyright

All commissioned art can be used and printed for personal use. A commercial licence can be discussed and comes at an additional cost and/or royalty rate.

## Procedure

Make sure to be clear with what you are looking to have commissioned before I get started on the artwork. Major changes different to what initially agreed upon will be charged extra if informed half way through or after the artwork is already completed.

Reference photos can be emailed to me directly or be made accessible for me via a google drive link. Please provide good quality photos and preferably from a few different angles (if it's a pet or a person) if possible.

It normally takes me 2-15 days to complete a commission depending on the complexity of the artwork. If you need your commission done by a certain date, make sure you give me a heads up so there is room for me to finish it on time.

I share many of my commissions on my social media and on my website once they're completed. Please inform me beforehand if you wish to keep your artwork private.

## Delivery

The artwork is delivered in the form of a print ready digital JPG file (300 dpi). Other formats are available too if needed.

Shipping of physical prints can be organised. In this case, bear in mind that I am located in Sweden and the artwork will be printed locally. I typically would not recommend this to my overseas customers as it is more costly and can delay the process. **Printing and shipping is not included in the commission price.**

## Rates

My rates are mainly based on the complexity of the illustration which include background and number of subjects. In order for me to determine your rate, please be as specific as possible with what you'd like to have illustrated. The price will vary.

Below is a list of artwork examples that demonstrates the different levels of backgrounds/complexity and their respective base rates.

Character = any living thing that makes out the main focus of the illustration, e.g. a person or a pet.  
**Note that the prices on display are there to give you a general idea. An exact rate is discussed and given per email once I know more about your specific commission request.**

## PRICE LIST (USD)

Base rates include: **1 detailed character + background.**

**+ \$25 for each additional character.**

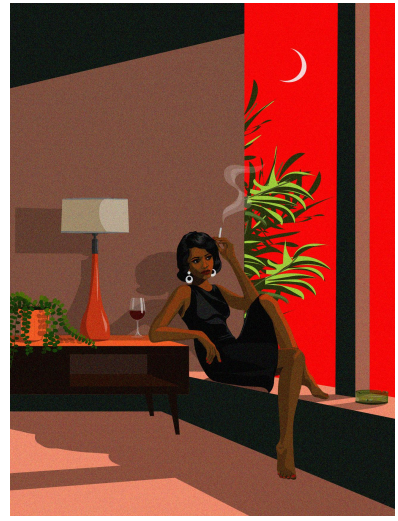

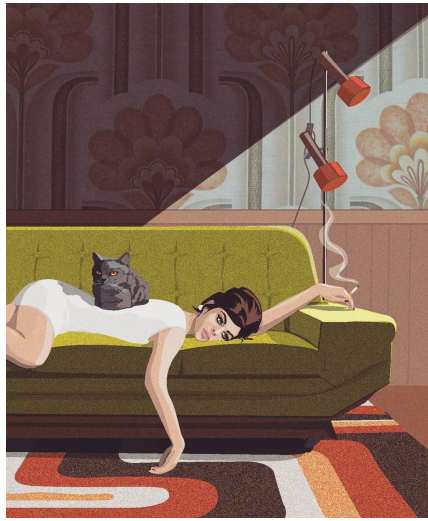

**Character + plain background: \$150**

---

**Character + simple background scene: \$200**

**Character + moderate background scene: \$250**

---

**Character + complex background scene: \$300-400**

---
